## New Year New Look

Campuscafe has been busy this year making the college dining experience better for all of the faculty, staff, and students of Georgia Perimeter College. New concepts, such as Chicken Wings, PASTY, Villa Prima Pizza, and FANS Smoothies have been a real hit since they began at the Clarkston and Dunwoody campuses. In an effort to improve awareness, Campuscafe has also teamed up with the Collegian newspaper. We have started offering coupons and bringing more awareness to the programs offered at Campuscafe for the benefit of the students.

Chicken Wings is the newest Campuscafe concept. People have been going crazy about them. It has become one of the best-selling items since the beginning of the school year. The PASTY concept is a new breakthrough idea that took months of planning to bring to fruition.

Campuscafe took the idea of the classic Cornish Pasty and threw an international twist on it. From American styled barbecue bacon burger, to a bold Japanese inspired teriyaki chicken, they want each pasty to have strong ethnic flavors. To improve their efforts, they will be holding a tasting of the Jamaican Pasty with students, faculty, staff, and families that are native to Jamaica. They want these to take you there; to smell Mexico when you bite into a Mexican Pasty.

Something else very important to the staff of Campuscafe is having options for everyone. They have widened their vegetarian menu to include more options this year. These include a VegiMax™ Sub, Veggie Quesadilla, Veggie Philly, and even a Spicy Veggie Pasty. Sustainability is also very important to Campuscafe. They have a no Styrofoam policy in all of their kitchens. This means paper cups, paper boxes, paper trays, and no harmful Styrofoam. The other way Campuscafe makes their kitchens safer for the environment is through the use of Green Chemicals in cleaning. At all locations, the staff is required to clean with environmentally safe chemicals. This seemingly small step may help start a larger movement in the GPC students.

As a step toward the right direction, Campuscafe has put out surveys to help improve the college dining experience at GPC. The beginning of a food committee is another important step in making the food service best fit the students, faculty, and staff. As a part of this, a few new concepts will be rolling out very soon. Ideas such as a grilled cheese concept, omelet station, sushi bar and many more are in the works right now.

Campuscafe is very excited to continue to serve the GPC community as best as they can. With the help of the new Auxiliary Director, Derrick Turner, they are intending on improving and becoming the best food service for this community of students, faculty, and staff. Students should look forward to even more changes coming to Campuscafe in the future.
