PROUD TO BE GOING GREEN

Find out the benefits of

Going Green:

greenventuresconference.org

Two employees of Smurti Corporation have decided to 'go green' with their purchase of two Zero Emission cars; the 2015 Nissan Leaf.

The Nissan Leaf is a compact electric car manufactured by Nissan, introduced in the United States in December 2010. The US Environmental Protection Agency's official range for the 2013 model year Leaf is 121 km and rated the Leaf's combined fuel economy at 115 miles per US gallon gasoline equivalent. As an all-electric car, the Nissan Leaf produces no tailpipe pollution or greenhouse gas emissions at the point of operation, and contributes to reduced dependence on petroleum.
